Projects and Initiatives

LumHat — Founder — lumhat-4c86a.web.app
Khmer-language olympiad mathematics platform inspired by AoPS, built to make competition-level math accessible to students who cannot rely on English resources. Next.js / Tailwind front end with KaTeX rendering and a community problem library.

Penchick Online Math Olympiad — Head of Problem Writing — penchickomo.replit.app
Lead the problem-writing team: authoring, reviewing, and curating original olympiad problems across algebra, combinatorics, geometry, and number theory.

Math Olympiad Study Group — Leader — Phnom Penh, Cambodia
Organize peer training sessions and share curated handouts and problem sets with fellow contestants preparing for national and international competitions.

Olympiad Training

MathWOOT (Worldwide Online Olympiad Training) — Art of Problem Solving
Advanced olympiad program covering algebra, combinatorics, geometry, and number theory at the IMO Shortlist level.

OTIS (Olympiad Training for Individual Study) — Evan Chen
Personalized problem-based curriculum with topic units and individually selected olympiad problems.

CMO Training Camp — Phnom Penh, Cambodia
National team training for IMO and Cambodia Mathematical Olympiad preparation.
